

MANAGED IT FOR SENIOR LIVING

Maintech provides managed IT built around how assisted living runs, for operators with three or more facilities. We keep care systems working through outages and support audit readiness, with clear visibility into every site.

If you are growing faster than your IT can keep up, Maintech manages the technology behind each facility, so your teams can stay focused on residents.

Care continuity through outages

Audit-ready every year

Visibility across every facility

MAINTECH

Built Around How Senior Living Runs

Care systems that keep working, with every facility in view.

Care Continuity

Phones, medical charts and medication records keep working through an internet or power loss, with resilience designed around total-care facilities.

Audit Readiness

Support to achieve and maintain compliance with HIPAA, HITECH, or HITRUST requirements as your estate grows.

Site Visibility

Vantage shows every Wi-Fi access point and switch drop on the facility floor plan, across all your sites.

Scalable Support

Maintech scales with your estate, from a single new facility to a full multi-site operation, with directly employed technicians and local parts access.

In Practice

An anonymized example from one multi-facility senior living operator.

Offline Resilience

Maintech designed the offline resilience approach for this operator's facilities.

Wi-Fi Visibility

The operator's team was constantly chasing Wi-Fi issues. Vantage gave them floor-plan visibility of every access point and switch drop.

Why Maintech?

Operators need an IT partner who understands care delivery and audit pressure. Maintech brings 50+ years of IT services experience and operates in 60+ countries. Book a review call with your Maintech representative to see how this applies to your facilities.
